

# Defend against threats with Guardian 365, your key to better managed security

Forsyte Guardian 365 integrates with Microsoft 365 Defender and Microsoft Sentinel to empower organizations to protect, detect, and respond to cyber attacks

## When a breach occurs, will you survive?

Of organizations do not have an incident response plan.<sup>1</sup>

Saved when businesses contain a cyberattack within 30 days.<sup>1</sup>

**\$10.5 trillion**

Cybercrime damage is projected to reach \$10.5 trillion annually by 2025.<sup>2</sup>

## Rethink your approach to security and protect your organization with the right solutions

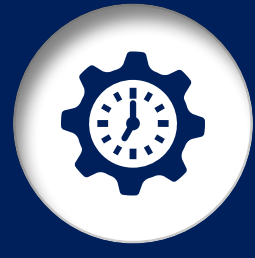

### Organizational security breaches leave you vulnerable

It takes a coordinated effort to successfully detect and mitigate threats in real time. Alert overload and a lack of resources make it hard to investigate every incoming incident, leaving some to fall through the cracks.

### Around-the-clock security is expensive

Even though many organizations are required to continuously monitor for threats 24x7 as part of their cyber insurance policy, it can be expensive and difficult to acquire the right talent to stay compliant.

### Cyberattacks are increasingly complex

As cyberattacks become more sophisticated, businesses are urged to implement new advanced technologies that can require more time, money, and expertise to operate at scale.

## Gain control of your security operations using Guardian 365 with your Microsoft Security product portfolio

### Accelerate threat response

Benefit from both human and tech-powered threat investigation and response. Automatically investigate threats across your IT environment with Microsoft 365 Defender and extend the value of the technology by adding an additional layer of human expertise to remediate incidents.

Always-on protection and monitoring shield your data from breaches and threats. Rather than hiring new cybersecurity personnel that specialize in threat detection and response, address your threat monitoring needs with an outsourced 24x7x365 Security Operations Center (SOC).

### Reduce overall cybersecurity costs

### Customize security dashboards

The Guardian 365 team moves fast to stay at the forefront of remediation and protection. We provide your team with 360-degree visibility and peace of mind with end-to-end security management and customized reporting – all powered by Microsoft's most advanced security technology.

## Complex security is made simple with Guardian 365, a Microsoft Verified Managed XDR Solution
